Pixel Art with Cross Stitches

Children's spatial intelligence and physical-kinaesthetic intelligence is enhanced by this creative project when they first design their own patterns and designs, for example, a pixel self portrait on checked paper (image-wise) and then embroider the pattern with a tapestry needle on cross stitch card (body-wise).

Let the children make their own self portraits on checked paper with inspiration from the Pixel Art trend. The number of squares/pixels must match the number of squares on the cross stitch card which is being used later.

Show the children how to sew cross stitches on cross stitch card using the template. Let the children know that it is OK to freestyle and change patterns, colours and details from the original template.

Intuition-wise

Intuitive intelligence. Enhanced by activities in which children must use their abilities to sense what (perhaps) will happen, and by mind reading and thinking synchronously.

Body-wise

Physical-kinaesthetic intelligence. Enhanced by activities in which children must use their physiognomy, physical strength and body to express ideas and feelings.
