## Decorative Faux Leather Paper Baubles

Make these lovely decorative baubles from faux leather paper strips with a printed floral pattern.

Cut 4 pieces of faux leather paper strips to your chosen length, depending on the size of bauble you want. Gather the strips and make holes at both ends approx. 1 cm from the ends of each strip using revolving hole punch pliers.

Turn over the bauble and spread the strips out equally.

Gather three of the strips and set a rivet by striking the rivet setting tool with a hammer as illustrated in the picture.

Make a hole for a rivet at the top.

Make a hole and set a rivet at the opposite side of the bauble by striking the rivet setting tool with a hammer. You may add more rivets in the paper strips when assembling large baubles.

Set the rivet by striking the rivet setting tool with a hammer.

Place the fourth strip around the bauble. Make a hole for a rivet where both ends of the strip meet and set a rivet by striking the rivet setting tool with a hammer.
