Christmas Drums made from Design Paper and decorated with Bells

Make these lovely Christmas drums from design paper for hanging on the Christmas tree. The drums are made from templates and are decorated with bells.

Cut out the parts for the drum using the template available as a separate PDF file on this page.

Glue all the parts together except the top. Make a small hole in one side and feed a piece of cord through as shown in the picture.

Now glue the top and the ribbon onto the drum.

Tie a knot and a bow in the cord to hang the drum. Tie the bells onto the ends.

Design Paper pad,
size 21x30 cm,
