Eggs made from Hard Foil and decorated with Mosaics

These eggs are made from sheets of hard foil decorated with glass mosaics and then cut out in the shape of an egg. Art and craft foil is applied to some of the mosaics using Fix Glue.

01 Place the template underneath the transparent hard foil sheet and secure with adhesive tape.

02 Apply a thick layer of A-color Allround medium glue lacquer onto the hard foil, staying inside the egg template.

03 Place the mosaics in the wet glue – make sure to stay inside the egg template.

04 Carefully cut out the egg.

05 Apply Fix Glue (non-permanent adhesive) on some of the mosaic fragments. Let it dry for approx. 15 minutes. Place the two-part art and craft foil on top of the adhesive surface, rub lightly with your finger and then remove the top foil layer.

06 Place the art and craft foil with the gold side against the adhesive surfaces. Rub lightly using a finger and then pull off the foil layer to separate it from the gold which is now attached to the chosen mosaic fragments. □
