Easter Chicks in Egg Shells

A chick made from a cotton egg painted with A-Color matt paint, mixed with Pop Up Line. When heated with a heat gun, the surface puffs up, adding texture to the egg. Attach Silk Clay eyes and a beak. Decorate with a bow, a wooden button and feathers.

01 Mix the Pop Up Line with A-Color matt paint in the ratio 1:1 and apply a thick coat of the mixture to the cotton egg.

02 Put the painted cotton egg onto a stick. Puff up the paint by moving the heat gun in circular motions over the egg at a distance of approx. 10-15cm. This makes the color puff up and gives a textured appearance to the egg.

03 Shape the eyes, the beak and wings from Silk Clay and press them onto the chick without using glue.

04 Paint an egg shell with A-Color matt paint and let it dry. Then glue it onto a wooden button for added stability.

05 Firmly place the chick inside the egg shell, securing it with a blob of Silk Clay. Use a glue gun for attaching a bow, feathers etc. to the chick.

An alternative
Decorate papier mâché chickens using the same procedure as above.
