

Watercolour on Straw Silk Paper

Straw Silk Paper has a rough, absorbent surface enabling watercolours to run together in a lovely way! Paint designs with liquid watercolour, Art Aqua Pigment, using a pipette. A technique anybody can master. Add details with a black Colortime marker.

01 Drip Art Aqua paint onto the straw silk paper using a pipette.

02 When the paint is dry, add details like flower stems using a water-based marker. We have used a black marker. You may use a Colortime marker. They do not run.
