Christmas Baubles with Decoupage Paper from the Paris series

These mother-of-pearl Christmas baubles are covered with Vivi Gade decoupage paper (the Paris series), attached with VTR adhesive.

01 Measure the circumference of the bauble and cut the decoupage paper 0.5cm larger. Adjust the height of the decoupage paper by measuring the bauble from pole to pole. Cut notches at the top and the bottom along the width of the paper as shown in the picture. Cut just over halfway to the center of

03 Apply VTR adhesive onto all the pointed sections which are attached onto the bauble one by one.

02 Use VTR adhesive for attaching the decoupage paper like a waist band around the bauble.

04 It may not be possible to get the pattern in the paper to fit, but on the other hand, the order of the layered sections can make a completely different pattern.

05 For an exciting look: decorate several Christmas baubles with other, matching patterns from the Paris decoupage paper series. □
