## A large luminescent Spider

A flat polystyrene UFO is the spider's body with small glued-on polystyrene UFO shapes for eyes. All is painted with luminescent Glow in the Dark paint. Glued-on black pipe cleaners are used for legs with threaded-on luminescent Nabbi beads.

**01**  
Paint the body and the eyes with three or four coats of Glow in the Dark luminescent paint (the more coats, the larger the effect). Leave to dry.

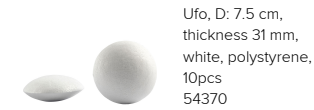

**02**  
Draw details on the body and the eyes using a black Uni Posca marker.

**03**  
Cut legs from pipe cleaners. Thread luminescent Nabbi beads onto the pipe cleaners.

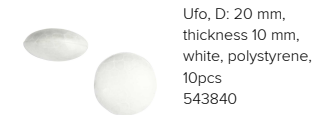

**04**  
Push holes in the body for inserting the legs. Push these in place - you may use a small blob of glue. Shape them and glue on the eyes.
