

A Collage with punched-out Designs

Cut-out and punched-out designs are glued together with a glue stick to make a collage using coloured Color Bar paper, magazines, brochures etc. The collage is then framed in a picture mount.

Start the collage by tearing, punching out and cutting designs from magazines, brochures, photo copies and Color Bar paper.

Combine the plain designs with the patterned designs and glue together with a glue stick. (You may draw the inside frame of the picture mount so that all that you want to be visible in the collage, is visible after fitting the frame.

Fit the collage inside the picture mount.
