

A Cactus in a Paper Pot

This cactus is sewn from felt. The prickles are pins. The pot is made from paper strips which are glued together.

1

The pot is made from Bohemian paper cut into long strips approx. 1.5cm wide. The strips are glued together into one very long strip. □ Roll the strip together into a large flat circle. Once the desired size is achieved, press the circle into shape and varnish with decoupage lacquer to stiffen it. □ Cut the cactus from green felt x 2. Sew the two pieces together and fill with polyester stuffing. Attach pins as prickles. □ Put the cactus into the pot. Pour sand around it to stabilize it.
