

Needle Felting on Polystyrene

These lovely penguins are needle felted onto polystyrene with a wood button added as a foot. Amusing eyes are added at the end for a humorous expression.

Inspiration: 11817

1

Felt wool onto the polystyrene item using a felting needle. The longer you felt, the denser the wool becomes.

2

Push the amusing eyes – adding a blob of glue onto the back of the eye – into the polystyrene item.

3

Felt the beak, feet and wings separately on a needle felting foam pad.

4

Felt on the beak, wings and feet.

5

Felt the hat separately making a thick triangular shape.

6

Felt the hat onto the front of the head.

7

Felt the mice's heads with grey wool onto polystyrene eggs. Felt the ears separately on a needle felting foam pad and then felt them onto the head. To make small eyes and snouts; felt for longer and towards the middle of the woollen dots.

Hearts

Felt the hearts with a felting needle and wool onto polystyrene hearts. The ribbons for hanging are from the Vivi Gade Helsinki series and are felted onto the hearts with a small wad of wool at the end.
