

Hearts made from Self-Hardening Clay

Roll out self-hardening clay thinly. Cut out the hearts with heart shape cutters. Dry and varnish with acrylic lacquer.

Inspiration: 11748

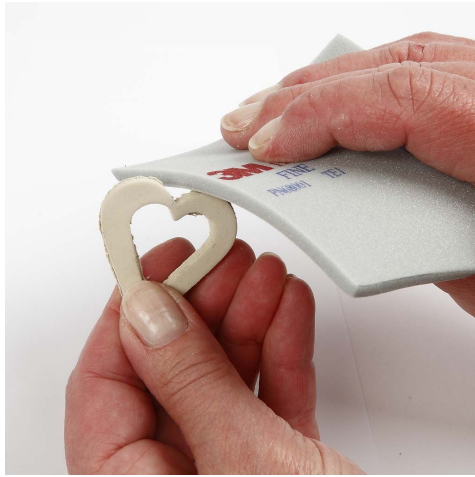

1.

Roll out the clay in approx. 2mm thickness.

2.

Let them dry for approx. 24 hours and – if necessary - gently sand them along the edges using a sanding sponge.

3.

Let them dry for approx. 24 hours and – if necessary - gently sand them along the edges using a sanding sponge.

4.

Varnish both sides and let it dry.

5.

Cut a piece of natural twine to your desired length and tie around the heart.
