

## A Star from Oslo Paper

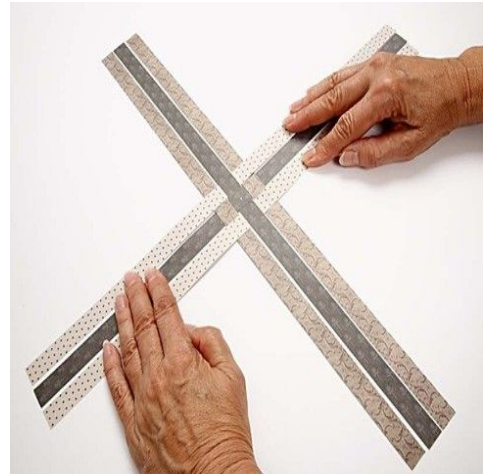

Woven with narrow weaving paper strips.  
Hung on a piece of paper cord decorated with wax beads.

Inspiration: 11938

**1**

Mark the middle of six weaving paper strips.

**2**

Place and weave as shown with a bit of space in between.

**3**

Glue the strips together with E-Z adhesive runner where they overlap.

**4**

Twist the two strips nearest each other in each corner half a turn and glue the ends together. Make another star just like this one.

**5**

Put the two stars together, back to back, rotate them 45 degrees and glue them together.

**6**

Glue the straight strips onto each star tip and trim. Make one and use the cut-off to measure the length of the others.

**7**

Attach a piece of paper cord and decorate with golden wax beads.
