

## Origami Birds made from Oslo Nature Origami Paper

Origami birds folded from Vivi Gade Design Paper from the Oslo Nature paper. □

Inspiration: 12536

**1.**

Fold a square piece of paper measuring 15x15 cm twice diagonally, open again and then fold it twice halfway and open again.

**2.**

Then fold the paper into a square  $\frac{1}{4}$  of the size of the original square. The openings are at the bottom.

**3.**

From both sides, fold the top layer towards the middle. Repeat on the opposite side.

**4.**

Fold down the top tip so it appears as a triangle.

**5.**

Unfold again.

**6.**

“Hold down” the back triangle whilst folding the front part upward.

**7.**

Fold in both sides, forming a diamond shape.

**8.**

Lift the bottom tip and fold in the sides, forming a diamond shape. Fold in the triangle behind, so the shape can lie flat and be smoothed. Repeat on the opposite side.

**9.**

Now you have a double tip with two individual tips at the bottom.

**10.**

Pull each tip up between the wings so they slope slightly upwards. Press flat.

**11.**

Fold it flat and smooth it. Repeat on the other side. □ Fold down between so the bird's head appears.

**12.**

Fold the wings downwards and the bird is ready to fly.
