

Mono Print on Hard Foil

Inspiration: 12508

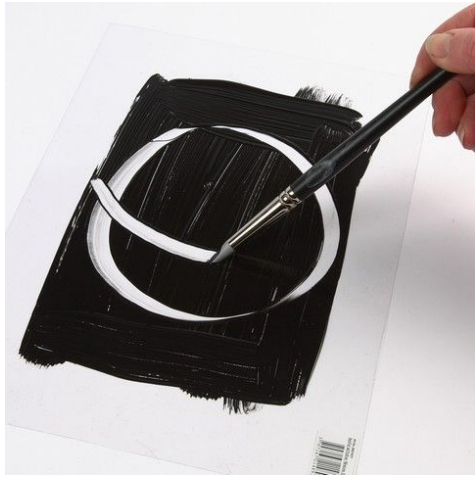

1.

Place paper or card underneath the fabric, which is placed on a hard surface.

2.

Apply some Textil Color fabric paint onto a sheet of hard plastic foil.

3.

Scratch a pattern or design into the wet paint using an Artist Line rubber brush. Remember that any text must be written in its mirror-image.

4.

Now transfer the sheet of hard plastic foil with the paint design onto the fabric.

5.

Press lightly on the whole of the sheet. Let the transferred design dry for 24 hours.

6.

Fix the finished fabric with an iron for approx. 3 minutes at a temperature suitable for cotton. Put a piece of baking paper between the fabric and the iron when fixing with an iron.
