

## Gauze Bandage Ghosts

Gauze bandage is draped over a polystyrene ball on a flower stick. The ghost is then painted with Glow-in-the-Dark paint which glows when the light is switched off. Draw the eyes with black Window Color outliner or black 3D-Liner.

**Inspiration: 12741**

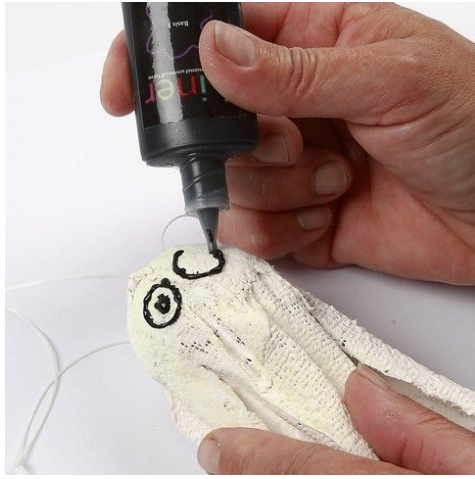

**1**

Attach a polystyrene ball to the end of a flower stick. Drape the gauze bandage over the polystyrene ball. Remember to attach a string for hanging between the layers of gauze bandage. Leave to dry.

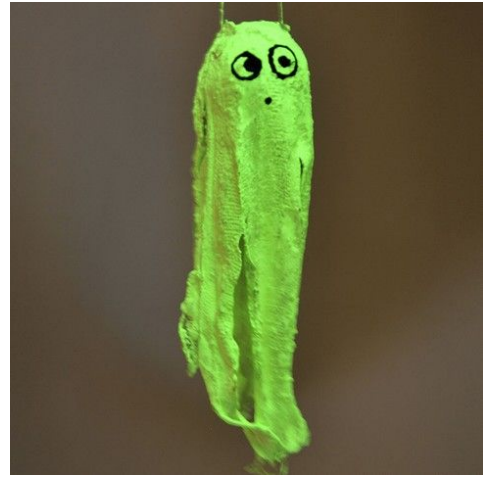

**2**

Paint with Glow-in-the-Dark paint. The more coats of paint, the greater the effect.

**3**

Draw eyes with a black 3D-Liner.  
Alternatively you may use a black permanent marker.
