

A Greeting Card with Dots and Stars on an Invitation

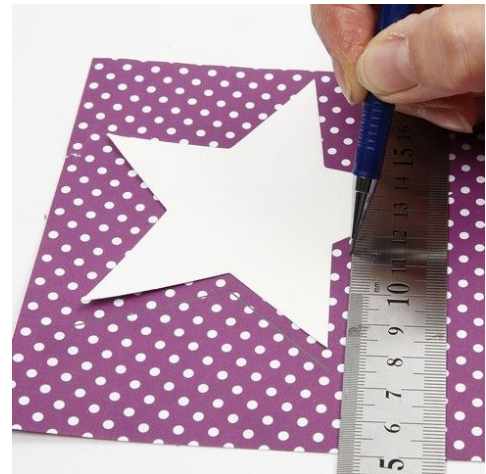

A blank greeting card with a pearlescent effect. It is decorated with Vivi Gade Design paper as well as card and paper from the Color Bar series. Finally the greeting card is decorated with punched-out stars, rhinestones, cotton cord and Pearl Pen.

Inspiration: 12919

1.

Cut the paper and card to fit the greeting card and attach these onto the greeting card with double-sided adhesive tape.

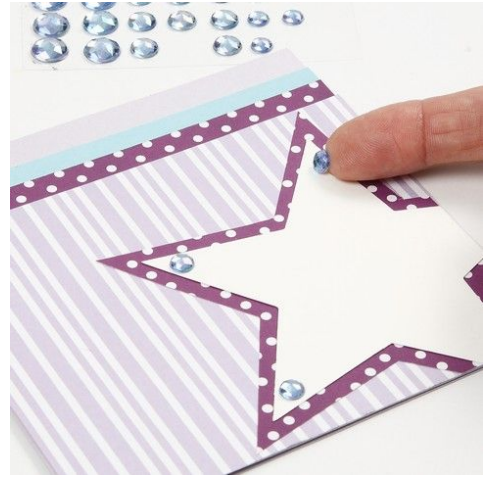

2.

Cut out a star from the dotted paper slightly larger than the large ready-made star.

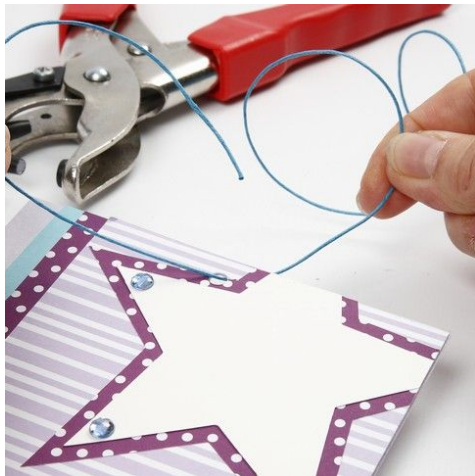

3.

Glue the two stars together and attach them to the greeting card with double-sided adhesive tape. Cut off the excess card star.

4.

Decorate with self-adhesive rhinestones.

5.

Use hole punch pliers to make a hole through both layers of the greeting card. Tie a piece of cotton cord through the hole.

6.

Decorate the greeting card with dots made with a Pearl Pen.

7.

Print a photo, trim and attach it to the greeting card.

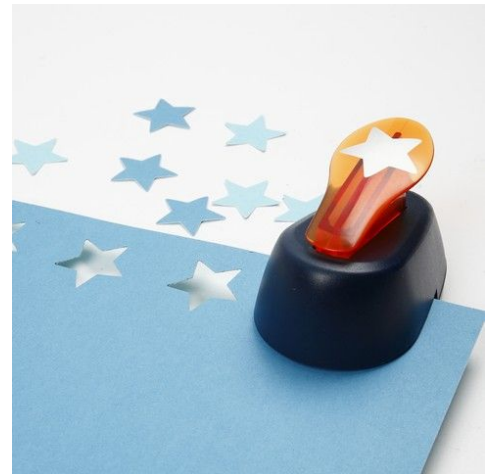

8.

Menu cards: Cut a 21 x 21cm piece of Color Bar card. Use a bone folder or a blunt needle to score the card, dividing it into three equal parts (i.e. 3 x 7cm).

9.

Cut a piece of card and a piece of paper slightly smaller than 7 x 21cm and attach both to the card – on either side - using double-sided adhesive tape. Attach the printed menu in the middle.

10.

Punch-out stars from Color Bar card.

11.

Attach the stars to the card randomly using 3D foam pads. Make a hole in the card and tie with a piece of cotton cord. Now a party song on a folded piece of paper can be attached on the inside.
