

Wooden Items covered with Foam Clay

All of these wooden items; the door sign, the napkin holder and the toothpick holder have been covered with Foam Clay modelling clay in colourful patterns.

Inspiration: 13163

1.

Use a pencil for drawing guidance lines on the wooden items – this makes it easier when applying the Foam Clay.

2.

Push small pieces of Foam Clay onto the wooden item. Only a small piece at a time and make sure to apply them tightly together.
