

Two-part Hanging Decoration with Wood Veneer & Christmas Designs

These two-part hanging decorations are assembled into a 3D Christmas decoration. A piece of very thin wood veneer is attached onto the hanging decoration using double-sided foil paper. Graphic Christmas designs are painted on using a flexible stencil.

Inspiration: 13159

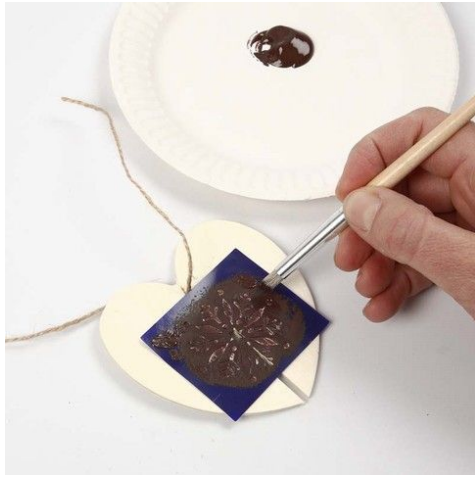

1.

Draw two heart shapes onto the double-sided self-adhesive foil tape using one of the two-part heart decorations as a template. Cut out and attach the foil tape hearts onto the heart decorations which was used as a template.

2.

Now draw another two hearts on the wood veneer. Cut these out and attach them to both sides of the heart with the double-sided self-adhesive foil tape already attached. Prior to attaching the wood veneer hearts, make sure to remove the protective paper from the foil tape.

3.

Decorate the other part of the two-part heart decoration with a Christmas design. Place a flexible stencil on the heart and dab on brown Plus Color Craft paint, revealing the design. Repeat on the other side and let it dry before assembling this and the heart decorated with the wood veneer.
