

## Christmas Figures from Glass Bulbs, Silk Clay and Pipe Cleaners

These chubby Christmas figures have a body made from a glass bulb, covered with Vivi Gade decoupage paper. The heads are modelled from Silk Clay and pressed firmly onto the body with pipe cleaners for hair, arms, antlers, etc. □

**Inspiration: 13332**

### 1.

Apply a coat of VTR glue to the glass bulb and attach decoupage paper - small pieces at a time – onto the wet glue.

□ When the glass bulb is covered with the small pieces of decoupage paper, apply another coat of VTR glue on top.

### 2.

Model a head from Silk Clay and attach it onto the screw fitting of the light bulb.

**3.**

Make eyes from two small balls of white Silk Clay and two smaller balls from black Silk Clay. Attach a black ball (pupil) onto the white ball and press the eye onto the figure's face. You may make a pixie hat from red Silk Clay.

**4.**

Wrap pipe cleaners around the body for arms. Alternatively push pipe cleaners into the wet modelling clay for antlers or a halo.
