

A wooden Key Cabinet, painted with Chalky Vintage Look Paint

This wooden key cabinet is treated with Chalky Vintage Paint and wax for a slightly worn look.

Inspiration: 14122

1.

Paint the key cabinet with Chalky Vintage Look paint (1 of 2 colours in the process) two or three times. NB: light colours = several coats. Leave to dry between each coat.

2.

Paint the wooden key cabinet once with the other of the two colours in the process. Leave to dry.

3.

Paint the outside of the key cabinet with the other of the two colours in the process. Leave to dry. In order to achieve the slightly worn look, sand with 80 grit sand paper.

4.

Apply wax at the end. This provides a lovely finish and protects against damp, allowing the key cabinet to be wiped with a damp cloth.
