

## Natural Eggs with Glass Paint and black Graphics

Natural egg painted in different colours with A-Color Glass paint which gives intense colour with a shine. When dry, imaginative graphics are drawn with a black glass and porcelain outliner. Insert a metal hanger with collar inside the hole of each egg.

**Inspiration: 13899**

**1.**

In order to manage the process in the best possible way insert a flower stick into the hole of the egg and use it as a handle. Secure it by using Power Tack Adhesive.

**2.**

Paint the egg with A-Color Glass paint, preferably in different colours. Leave to dry and remove the flower stick.

**3.**

Decorate the egg with graphic designs using a black outliner for glass and porcelain.

**4.**

Squeeze the legs of the metal hanger completely together using flat nose pliers. Carefully let go once the legs are as far inside the hole as possible.

**Another example**
