

A two-part transparent acrylic Egg with an abstract Painting

Each inside part of the two-part transparent plastic egg is decorated with A-Color metallic paint in several colours. The egg is then assembled and the colours are shaken together to make an abstract painting. A piece of coloured elastic cord is attached at the top for hanging.

Inspiration: 13892

1.

Put three drops of A-Color metallic acrylic paint in different colours in one part of the egg. Place a small bead inside the egg and shake it, mixing the colours. Open the egg and remove the bead. Leave to dry and attach a piece of elastic cord for hanging.
