

Stretched Canvases with Watercolour

Draw figures with Poster Hobby Markers on canvases and fill them in with Aqua Pigment liquid transparent watercolour. Drill a hole for the bonsai wire and attach it to the back of the canvas.

Inspiration: 1697

1

This activity aims to use the long, narrow shape of the canvas and combines it with bonsai wire, creating fun pieces of artwork where the designs “reach beyond the frame”. Work with liquid water colours, which give some new, different options on canvas.

2

The same technique can be used for all sizes of canvas.

How to do it
