

A Paper Yarn Hanger for a floating Shelf

This hanger is made from paper yarn as longcords with beads. The cords are attached in the holes of a round wooden disc under which a large wooden bead is threaded. Finish with a knot.

Inspiration: 14102

1.

Cut two 300cm pieces of paper yarn. Thread them through a key ring and tie a knot at the top so that there are now four (4) equally long cords to work with.

2.

Randomly thread a bead onto each of the four cords. Tie a knot underneath each bead. Distribute the cords at roughly the same distance and feed each cord through a hole in the wooden disc.

3.

Thread all four cords through a wooden bead underneath the wooden disc, tie a knot and trim the cords.
