

An Elf's Door made from Ice Lolly Sticks

This door is made from the ice lolly sticks which are part of the material kit for a self-assembly miniature fairy-tale scene according to your imagination. The sticks are cut and assembled with double-sided adhesive tape. The door is then painted with Plus Color craft paint.

Inspiration: 14229

1.

Cut off both the round ends of seven (7) ice lolly sticks. Place the sticks vertically side by side. Trim two (2) ice lolly sticks so that they fit across the seven (7) ice lolly sticks.

2.

Attach the two (2) ice lolly sticks across the seven (7) vertical ice lolly sticks using adhesive tape.

3.

Attach ten (10) ice lolly sticks on top of each other in five (5) pairs.

4.

Place the five (5) pairs as a door frame around the door and trim. A TIP: Draw guide lines before cutting. Use a pencil.

5.

Attach the door and the frame to each other with adhesive tape.

6.

Paint the finished door and frame according to your own taste using Plus Color craft paint. Leave to dry.

Inspiration

Hey? What's that small door in the corner of our living room? I wonder, has an elf moved in?

Inspiration

Can the elf ski, and is there enough snow for that?

Inspiration

Has the elf been up all night washing his clothes?

Inspiration

Is the elf having guests for Christmas? Who might they be and are the presents for them?
