

White Diamond Hanging Decorations with glittery Copper Paper

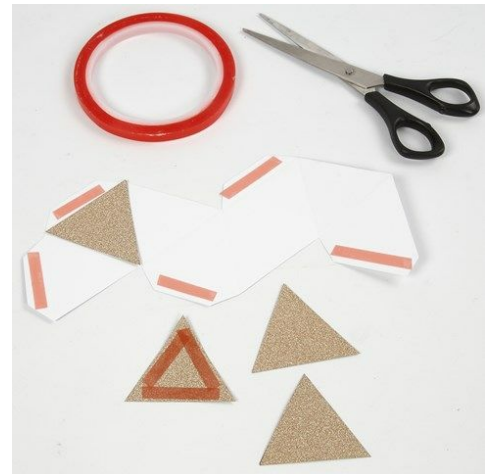

Every other side of these white punched-out self-assembly card diamonds are covered with glittery Vivi Gade design copper paper. A leather cord decorated with large wooden beads is attached for hanging.

Inspiration: 14212

1.

Attach double-sided adhesive tape onto the front flaps of the punched-out piece of card – outside the score line used as a folding guide.

2.

Make a template from any of the triangles on the punched-out piece of card. Draw the outline of this template onto glittery design paper, cut out and attach double-sided adhesive tape onto the back of the glittery design paper triangles. Attach a glitter design paper triangle to every other triangle of the punched-out card diamond.

3.

Cut a piece of leather cord, double it over and tie a knot at the bottom. Thread wooden beads onto the doubled-over leather cord.

4.

Make a bend at each score line. Remove the remaining protective layer of double-sided adhesive tape – one side at the time - and assemble the diamond. NB: remember to place the leather cord with the knot inside the punched-out card before completely closing the diamond.
