

A Sculpture made from Floral Wire, Masking Tape and Foam Clay

The sculptures are made from floral wire, inserted into a wooden board/icon for a stand. Masking tape is wrapped around the wire, adding polystyrene items as you go along to add substance. Finally, model Foam Clay onto the sculpture, including the stand.

Inspiration: 14179

1.

Begin with the legs and the lower body and build the figure's skeleton from floral wire. Staple the floral wire onto the wooden board/stand for two legs using a stapler.

2.

Wrap masking tape around the skeleton. Attach one or more polystyrene items as you go along to add substance to the figure.

3.

Model Foam Clay onto the skeleton and onto the stand. Alternatively, you may wish to paint the stand. Leave to dry.
