

Personal Jewellery with Metal Tags

A necklace with tags embossed with a letter and small texts. The pendants are slid onto a bead chain and further decorated with a faceted bead and a metal feather.

Inspiration: 14853

1

Mark the line and the middle. Now emboss the letters on the tag using embossing stamps, the Simple Strike Jig and the metal stamping hammer.

2

Using a black enamel marker, push the ink into the text and leave to dry for 1-3 min. Wipe away the excess stamp enamel from the metal tag with a piece of kitchen roll.

3

Make a loop on the head pin just above the bead – follow the instructions in idea No. 12280.

4

Attach a round jump ring to the pendant. Close it by twisting the two ends together with two pliers.

Another variant

Assemble everything on a 80 cm bead chain. Fasten the chain with the outer small bead inside the supplied collar fastener at the opposite end.
