

Fairies modelled from Silk Clay and Foam Clay

These fairies have polystyrene hearts covered with Foam Clay for bodies and Silk Clay heads, feet and hands. The arms are made from pipe cleaners – everything is assembled without glue.

Inspiration: 14881

1

Cover a polystyrene egg (3.7 cm) with Silk Clay for the head. Add a nose, pointy ears and eyes.

2

Cover a polystyrene heart (6 cm) with Foam Clay.

3

Model feet from Silk Clay and place the body onto these.

4

Place the head onto the body and push two shortened pieces of pipe cleaner with Silk Clay hands inside the body. You may want to add a magic wand as well.

5

Roll thin Foam Clay strips for the hair and decorate with sequins, crowns etc.

6

Push wings onto the back with a small blob of Foam Clay which acts like glue.
